## About Company

We provide excellent & innovative design for kitchen starting from entire layout, electrical, water drainage layouts. Have cut out installation of our design kitchen equipment with the help of our parent company  Paras consultants, who is in the hospitality business from 35 years. We manufacture high quality equipment as per individual requirement to each kitchen

## Commercial Range

Commercial Range for (Restaurant, Hotel, Resort kitchen)  
A la Cart Cooking means Individual cooking for the gas we make these Equipment in mix quality of SS202-304, When & Where its require, by this we reduce the cost for Eco clients.

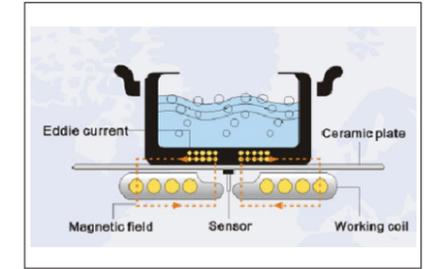

## Premium Range

Undoubtedly we do an excellent work for micro to mega kitchens, right from café, restaurant, to hotel, resorts, flight kitchen, hospital kitchen, industrial kitchen, religious kitchen...etc for such requirements we do design work for each kitchen and then we manufacture equipment accordingly.

## Induction Cooking Range

Induction is a method, completely different from all other cooking technologies it does not involve generating heat which is then transferred to the vessel it makes the cooking vessel itself the original generators of the cooking heat. Wide Range of induction cooking range used for hotel kitchens, flight kitchen, hospital kitchen, its includes equipment like , appam maker, braising pan, chappati puffer, griddle plates,

## Solar induction cooking Range

We do excellent work In renewable energy field as you are aware it is pollution and noise free green energy, its require minimum maintenance at money saving. We make entire kitchen running by solar energy we connect it with electrical grid as per government approval. It gives you edge over competition on energy cost. We use Induction cooking equipment for more saving. For more detail please contact our parent company  Paras Consultants.

## Solar-Induction Cooking

We provide professional operation and maintenance service with dedicate from of expertise field Service engineers and technical. Our lead engineers each have extensive international expertise. For solar kitchen we execute the full turnkey solar power plant, electrical equipment.
